AN OMINOUS SHADOW FALLS OVER THE LEAF! IS IT AKATSUKI? NEXT TIME: "PENANCE!"

got milk?

milk builds strong bones!

fda research shows that a daily intake of at least four servings of calcium and other nutrients found naturally in milk and other dairy products can strengthen and aid bone development. the fda does not, however, encourage the removal of bone matter and the use thereof as weaponry. Such actions may lead to fatal illness, albinism, strange hair parts, inability to wear shirt properly, spots on forehead, and death within ten chapters.
