The PLASTIC PERILS!

READING You will always remember!

READERS — SOUND OFF!

Dear Mr. Kanigher: I hate to say this but I think you've ruined *Wonder Woman Comics*. This Wonder Woman of the forties doesn't seem as realistic as the one of the fifties and sixties. Her features are too crude. I also miss the other characters that you have so conveniently disposed of. I would so like to see the old Wonder Woman. I'm very disappointed. Your ex-fan, Bonnie Kreider.

Dear Miss Kreider: I'm disappointed that you're disappointed. You represent a valid point of view. But bear with the golden age Wonder Woman; like caviar she might grow on you. The future might hold two Wonder Women. Fans have suggested one from the golden age and one from the present. Story and art to match. Pity the poor writer and artist. Be patient with our efforts. RK.

* * *

Dear Mr. Kanigher: If there is anything I loathe in this world, it is a bunch of GHOULS sitting on a grave and cursing the dead one below. That's the nasty impression I got from the most recent *Wonder Woman* letter column.

I will not deny that, previous to the change in format, *Wonder Woman* often was childish, but since she was aimed at the younger readers, I see no reason for laughing at her. Fandom, as Rick Weingroff wrongly stated, is mainly made up of men and boys, and, I would like to add, their tastes are radically different from those of the younger boys and most of the girls. They never read *Wonder Woman* regularly before the change in format, but after the change they are oh! so willing! to heap abuse on her. They refuse to recognize the validity of a character who hasn't got the "right" kind of format, writer, or artist. They refuse to recognize the rights of other readers, thus they forfeit their own rights.

I bought *Wonder Woman* before the change, and I continue to do so. The artwork was perfect before; as far as I'm concerned it's so-so now. The stories were good before; well they're good now. But this is my opinion, and it comes from my personal point of view. It is only valid as a measure of me, not Wonder Woman. Wonder Woman was "perfect" before, and is "perfect" now, because then and now, she attracts the type of audience she was or is designed for. As she was designed for children, so she attracted them. As she IS designed for fandom, so she attracts

it. Down with ghouls! Irene Vartanoff, Bethesda, Md.

Dear Miss Vartanoff: You fascinate me. You fry me for Metal Men and defend me for Wonder Woman. Are you for real? RK.

* * *

Dear Mr. Kanigher: First of all let me congratulate you on the wonderful success you have had with your Golden Age Wonder Woman. The "new" WW is as good as the "old" one was bad. She is still not great however, merely good. There is quite a bit of improvement needed to enable her to be ranked among the greats.

Let's use the current issue, April number 161, as an example. The cover was very good, silent covers with dark backgrounds are always good. Keep the covers silent and you'll have no problems with them at all.

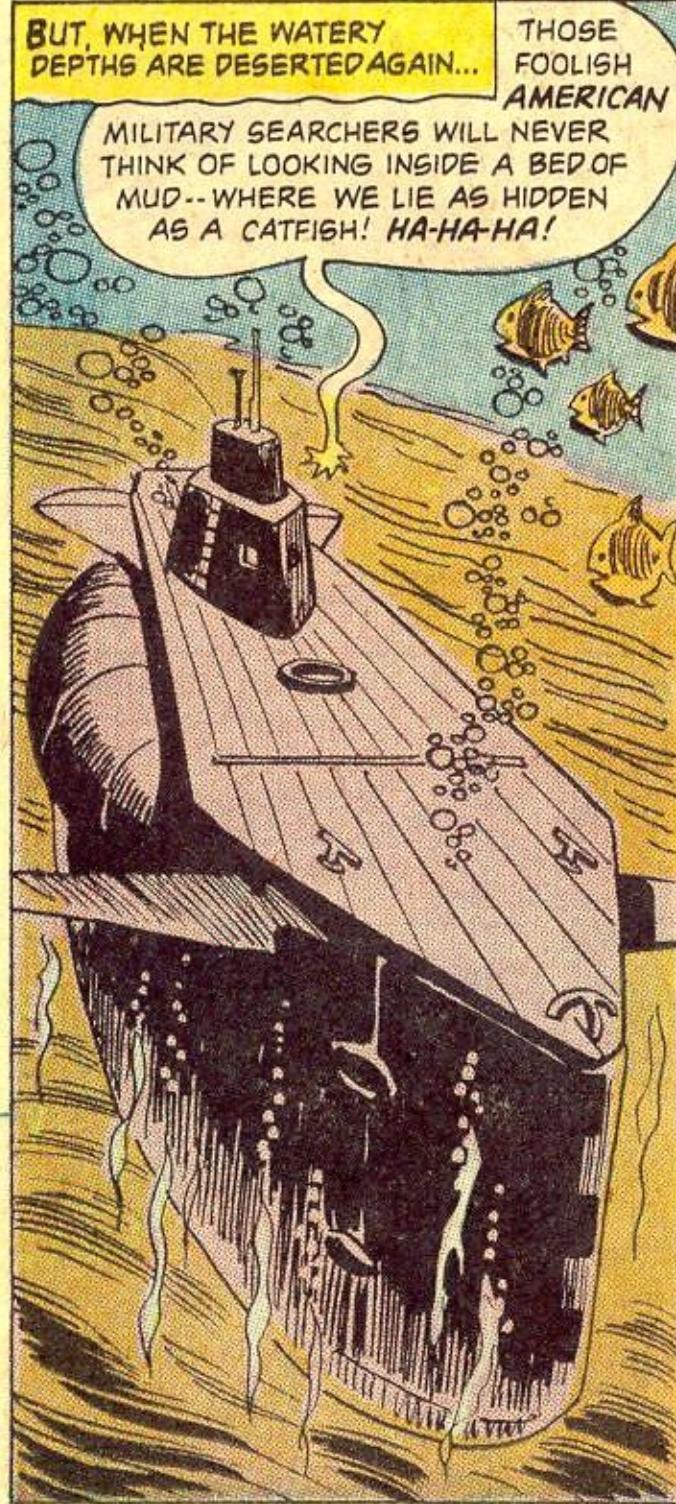

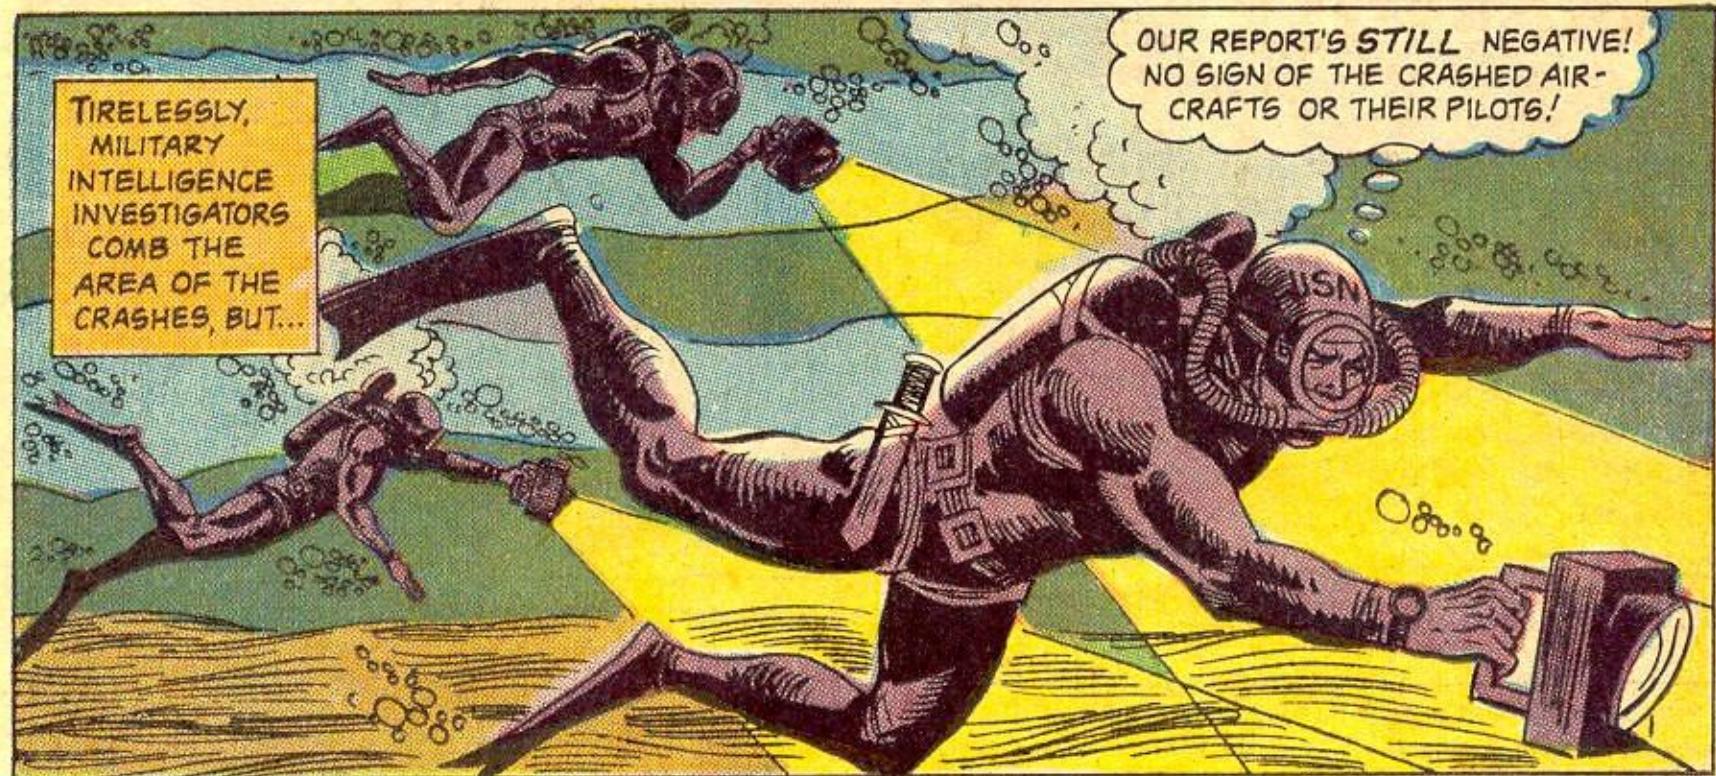

The lead story, "The Curse of Cleopatra," was good but it could have been much better if it had been a full-length story. It desperately needed the extra room in which to develop the plot. In fact, I think all your stories should be full-length. With only 25 pages to work with, anything else is, to me, much too short. The story also had several very weak points that needed work on. The beginning was very weak, especially the scenes where the countess is swinging Di thru the air by her ankles and the one where WW uses that sneezing routine to cover up her identity. Another weak point was the interrogation of the crooks on page 8. It is scenes like these that hurt the quality of the stories.

The second story, "Battle Inside of a Brain," was so bad that I'm not even going to comment on it. As to the controversy about the art, I am undecided. Right now I don't care if you keep it as it is or if you change it. Your letters page is really excellent. It has gone from the worst at DC to the best. Bill Warders, Covina, Calif.

Dear Mr. Warders: After continuously running novels in *Wonder Woman* for a number of years I have switched to two tales per issue as a change. I'm getting "Yeas" and "Nays" on that as I do with almost everything I try out with the Amazon. You might be interested in knowing that "WONDER WOMAN—TRAITOR!" in *WONDER WOMAN*—AUG. No. 164 is a full-length novel. RK. P.S. I just realized that your letter will be printed in that very issue.

EXCITING ANT FARM

AS SEEN ON TV!

AN ANT'S ENTIRE WORLD! COMPLETE WITH STOCK OF LIVE ANTS!

WHAT IS AN "ANT FARM"?

The ANT FARM is a clear, unbreakable plastic, escape-proof case, measuring 6" x 9", containing farm buildings, a windmill, silo, trees and barnyard, complete with soil, sandbar and a stand. The ants work down into the soil and use the sandbar for building their hills. The FARM is so constructed that the ants are visible from every angle, both above ground and underground.

FASCINATING!

A living TV screen. The ants put on a quiet but exciting show that will keep you fascinated for hours.

EDUCATIONAL!

An education in nature study as well as work and patience.

WORLD'S TINIEST ENGINEERS!

Ants are actually the world's tiniest construction engineers. They perform feats of stamina that if they were to be duplicated by humans, it would take millions of dollars and hundreds of thousands of tons of equipment to perform the same job that one tiny ant can do. What's more, the ants seem to have a special sense for construction which has actually been studied by human engineers.

SEE YOUR TINY PETS . . .

Watch them dig tunnels—see them build roads—marvel as they erect bridges and move mountains before your very eyes. Ants are the world's tiniest engineers and seeing them plan and construct their intricate highways and subways is fascinating. But they do much more than that! Through the clear plastic walls of your ANT FARM you see the ant soldiers guarding the roads . . . the laborers carrying their loads . . . the supply corps storing away food for the rest of the colony. Yes, the ANT FARM is actually a LIVING TV SCREEN that will keep you interested for hours.

ANTS CANNOT ESCAPE FROM FARM ENCLOSURE!

Multi-use design is the answer. For example: The Slide Projector quickly and easily converts into the Photo-Enlarger, Spectroscope, Cloud Chamber Illuminator. Similarly, the Transit Head doubles as a Telescope Mount. Such multi-purpose design makes possible an all-science lab at an unheard-of low price. Multi-purpose design is used only where it is advantageous, and not for such applications as the permanently-mounted weather instruments, where it would not be practical.

KIT-A-MONTH — OR ALL AT ONCE
