# WONDER WEAPONS

R-207

Over the years, Wonder Woman has acquired unique devices that aid her in her fight against evil. Here are some of the more important ones . . .

## THE MAGIC LASSO—

Presented to Wonder Woman by Aphrodite and Queen Hippolyte, the golden lasso is woven of magical, metallic links. When anyone is roped by this very special lasso, he must submit to the will of whoever holds the other end of the magic rope. So powerful is the lasso, that if Wonder Woman herself was ever wrapped in its strands, she too, would become the captive of whoever was wielding the lasso. In addition to this incredible power, the lasso is physically indestructible, and can be stretched to almost limitless lengths.

## THE ROBOT PLANE—

Wonder Woman's amazing transparent robot plane is a product of Amazonian science. The only force that can activate it is the vibration of Wonder Woman's voice. The ability to summon her plane verbally has saved the Amazon's life on many occasions.

The transparent materials of the plane are stronger than steel. Its structural strength is necessary, for the plane is capable of traveling at unbelievable speed. Since Wonder Woman does not really fly, but merely glides on wind currents, her flying speed is not great. Her plane more than makes up for that. It is also equipped with an Amazonian Omni-Wave televiser, which has unlimited range.

## BRACELETS—

In ancient times, after Hercules tricked Queen Hippolyte into removing her magic girdle, the Amazons were put in chains and enslaved. Aphrodite released them and led them safely to Paradise Island . . . but from that time on, every Amazon had to wear twin bracelets, designed to look like manacles, to remind them never to submit to the will of men.

As part of their recreation, the Amazons invented a game known as "Bullets and Bracelets," which became a regular part of their Olympics. Guns were fired at the players, the object being to deflect the shots with the bracelets.

Wonder Woman's bracelets are made of Amazonium, an invention of Hippolyte's scientists. The strongest metal on Earth, harder than diamond, her bracelets are enchanted and add to her strength.

But there's an unusual side-effect of this magic: If Wonder Woman's bracelets are joined together by someone else—in any way (chained; welded, etc.) she becomes helpless until someone else separates the two bracelets.

## THE TIARA—

A more attractive form of Amazonium was used to forge Wonder Woman's tiara. Besides being an ornament, its point is capable of cutting through anything. And, if necessary, Wonder Woman can unexpectedly use her tiara as a boomerang.

# The Adventures of CORGI Boy

It was midnight. I was going about 210 mph in my Corgi Adams 4 Engined Dragster, hot in pursuit of my old arch enemy Dr. Fang in his Ford GT 70. Fang, who had just escaped from the Glacier Caves prison where I had put him only three weeks ago, had committed another heinous crime.

But by the time I regained my composure and speed, Dr. Fang had had time to reach his hideout and change cars. This time he would be even harder to catch in his Porsche 917. However, from a previous encounter with Fang along this very road, I recalled a risky but negotiable shortcut and was able to intercept Fang and immobilize him and his car with one blast from my dash controlled freeze ray.

He sabotaged the Orbit X Pluto shot. Just as I was about to overtake him in my slick and skidded out of control tumbling over and over landing into a ditch. Fortunately I was uninjured as I'm practically indestructible.

# How to put your hands to work making money

**Do you remember what you paid the repairman, the last time you had trouble with your TV, Air Conditioner, or Automobile? Do you know how much it would cost today—to fix your roof, install new kitchen appliances, or change the electrical wiring in your home?**

**Now, turn it around—and look at it this way: do you realize how much money you could earn today if you were a trained Electrician, Auto Mechanic, or Electronics Technician? And do you realize how many job openings exist in these fields... either full or part time?**

Suddenly, it's a wide-open world of opportunity, if you're one of those fortunate people who enjoy working with their hands. If you can choose one of the high-paying fields where your talents are needed and appreciated.
